

**Card enrollment  
guide in Google Pay,  
for private  
individuals**

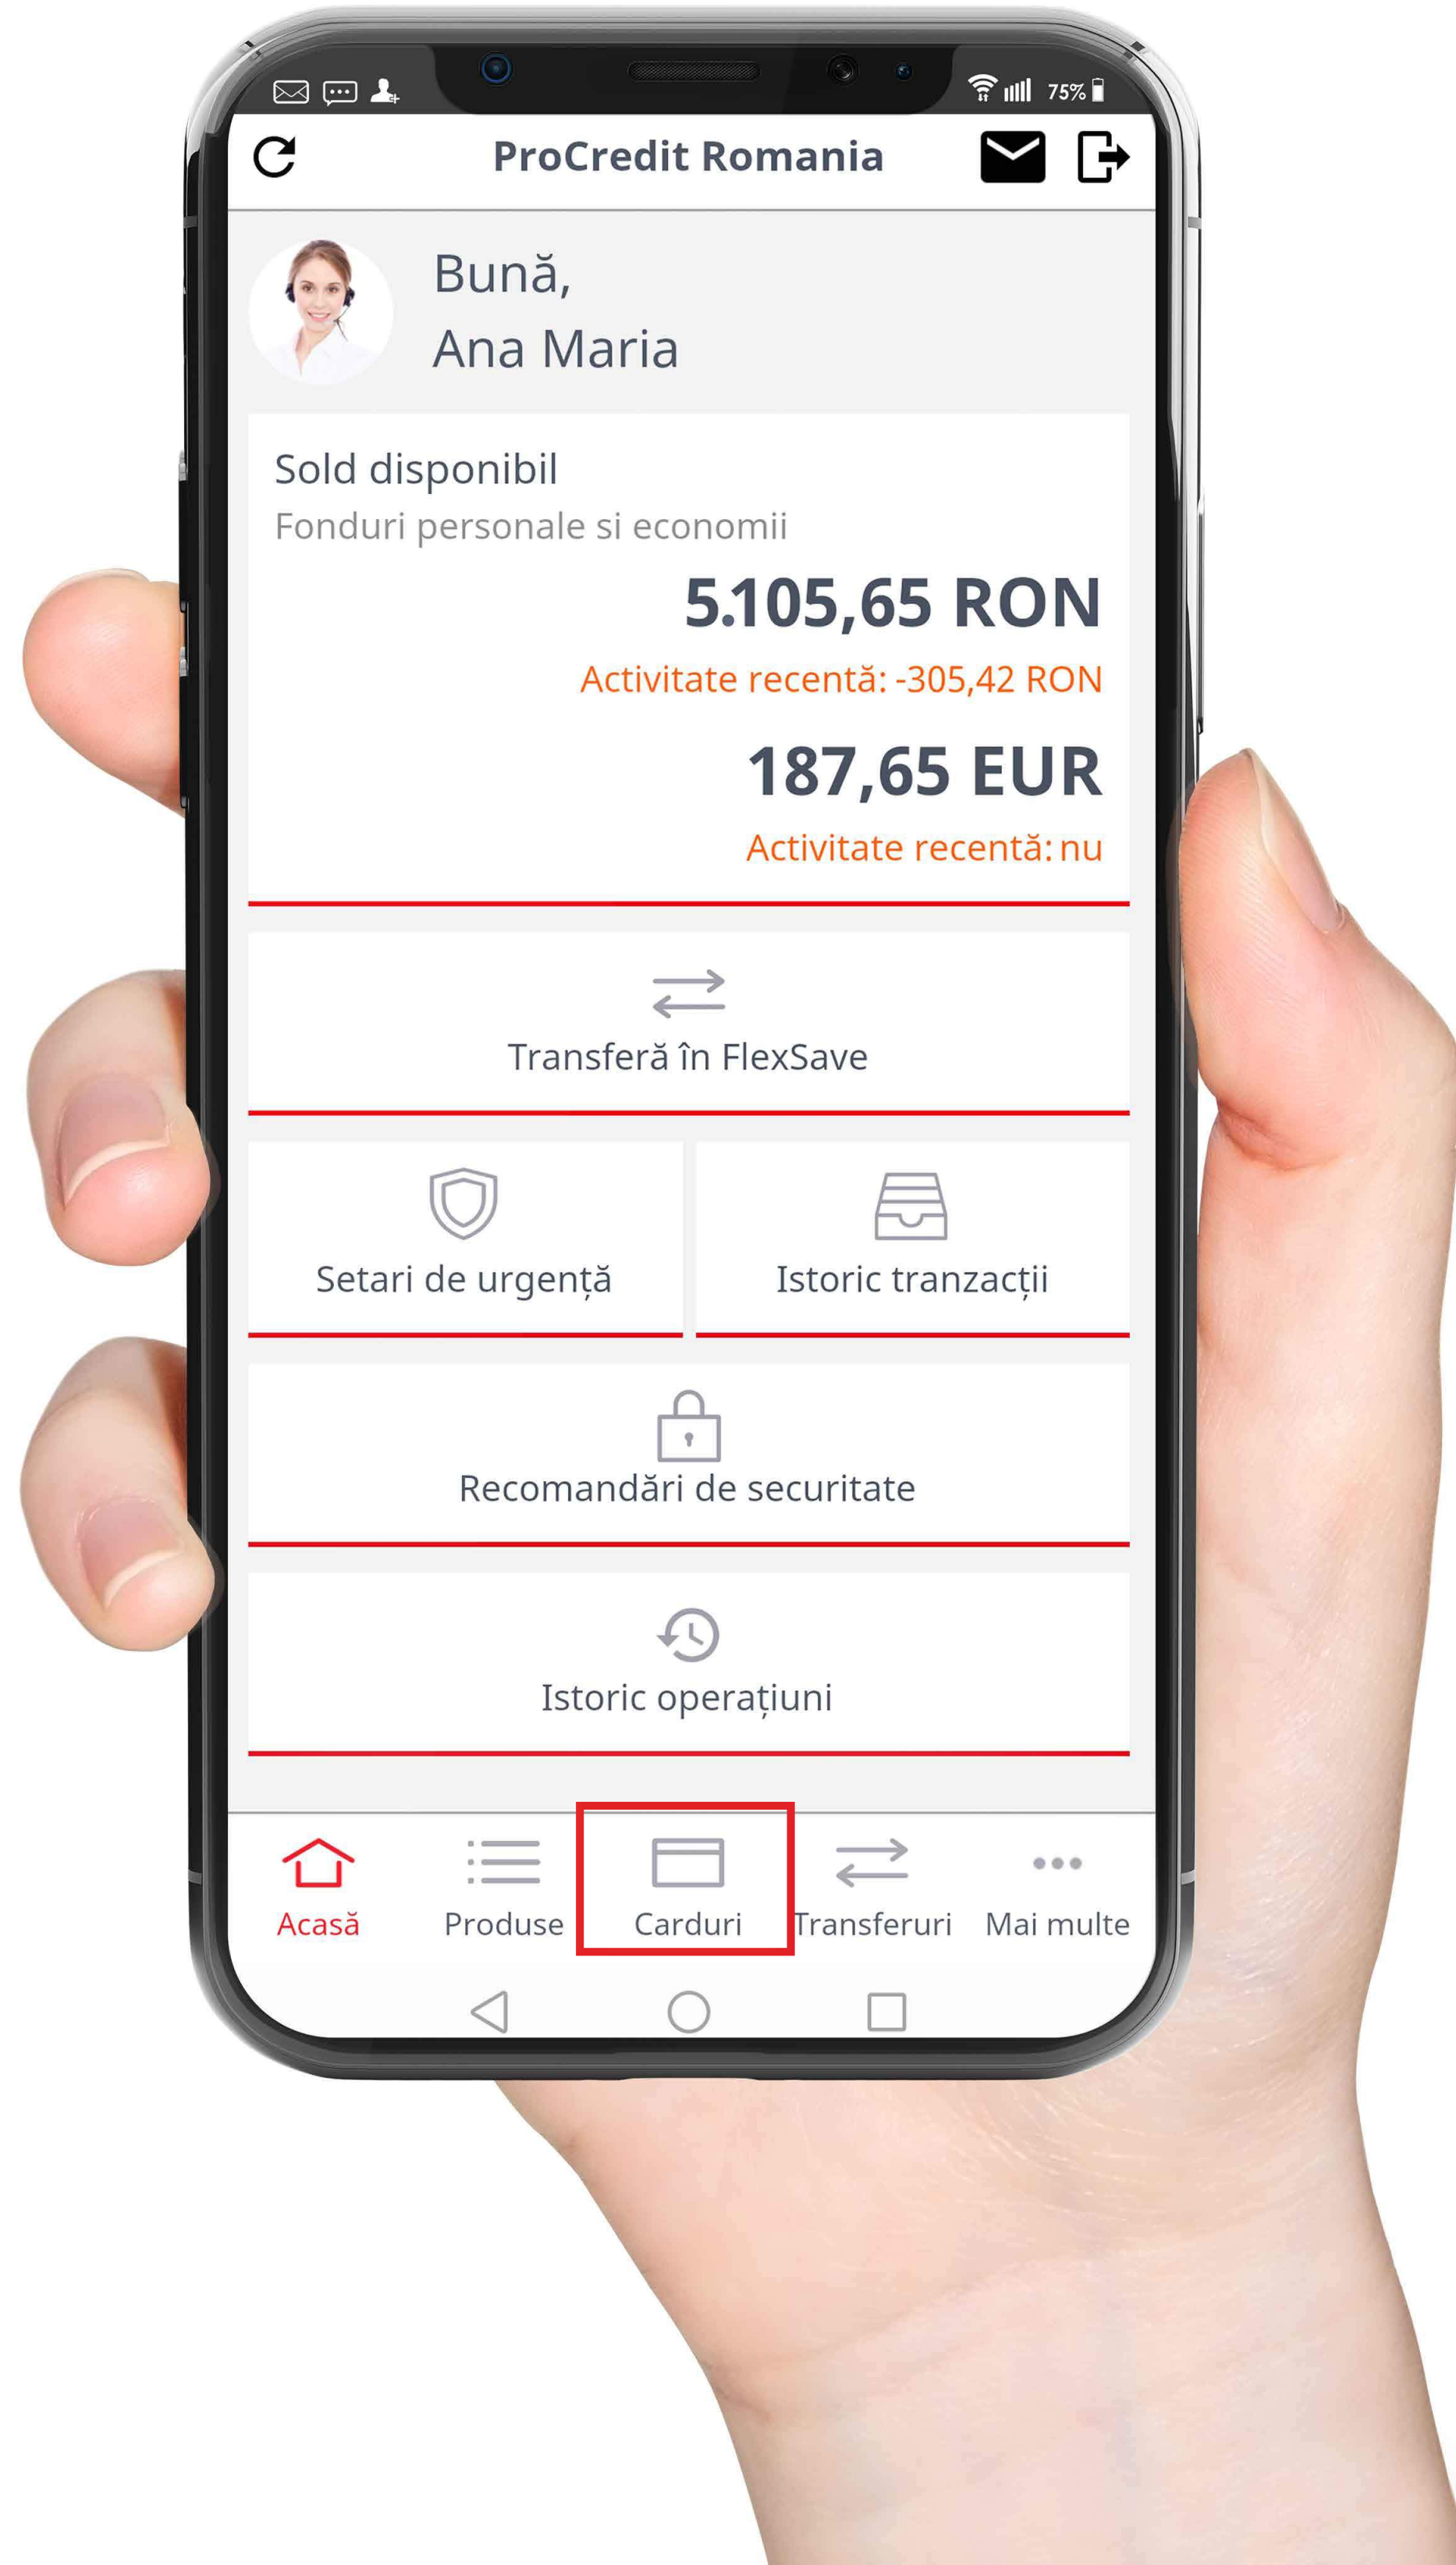

## 1<sup>st</sup> Step

Update your Mb@nk application to make sure that you are using the latest version.

If you have not used ProCredit's Mobile Banking app, then we recommend that you consult this guide [here](#) before your first authentication.

## 2<sup>nd</sup> Step

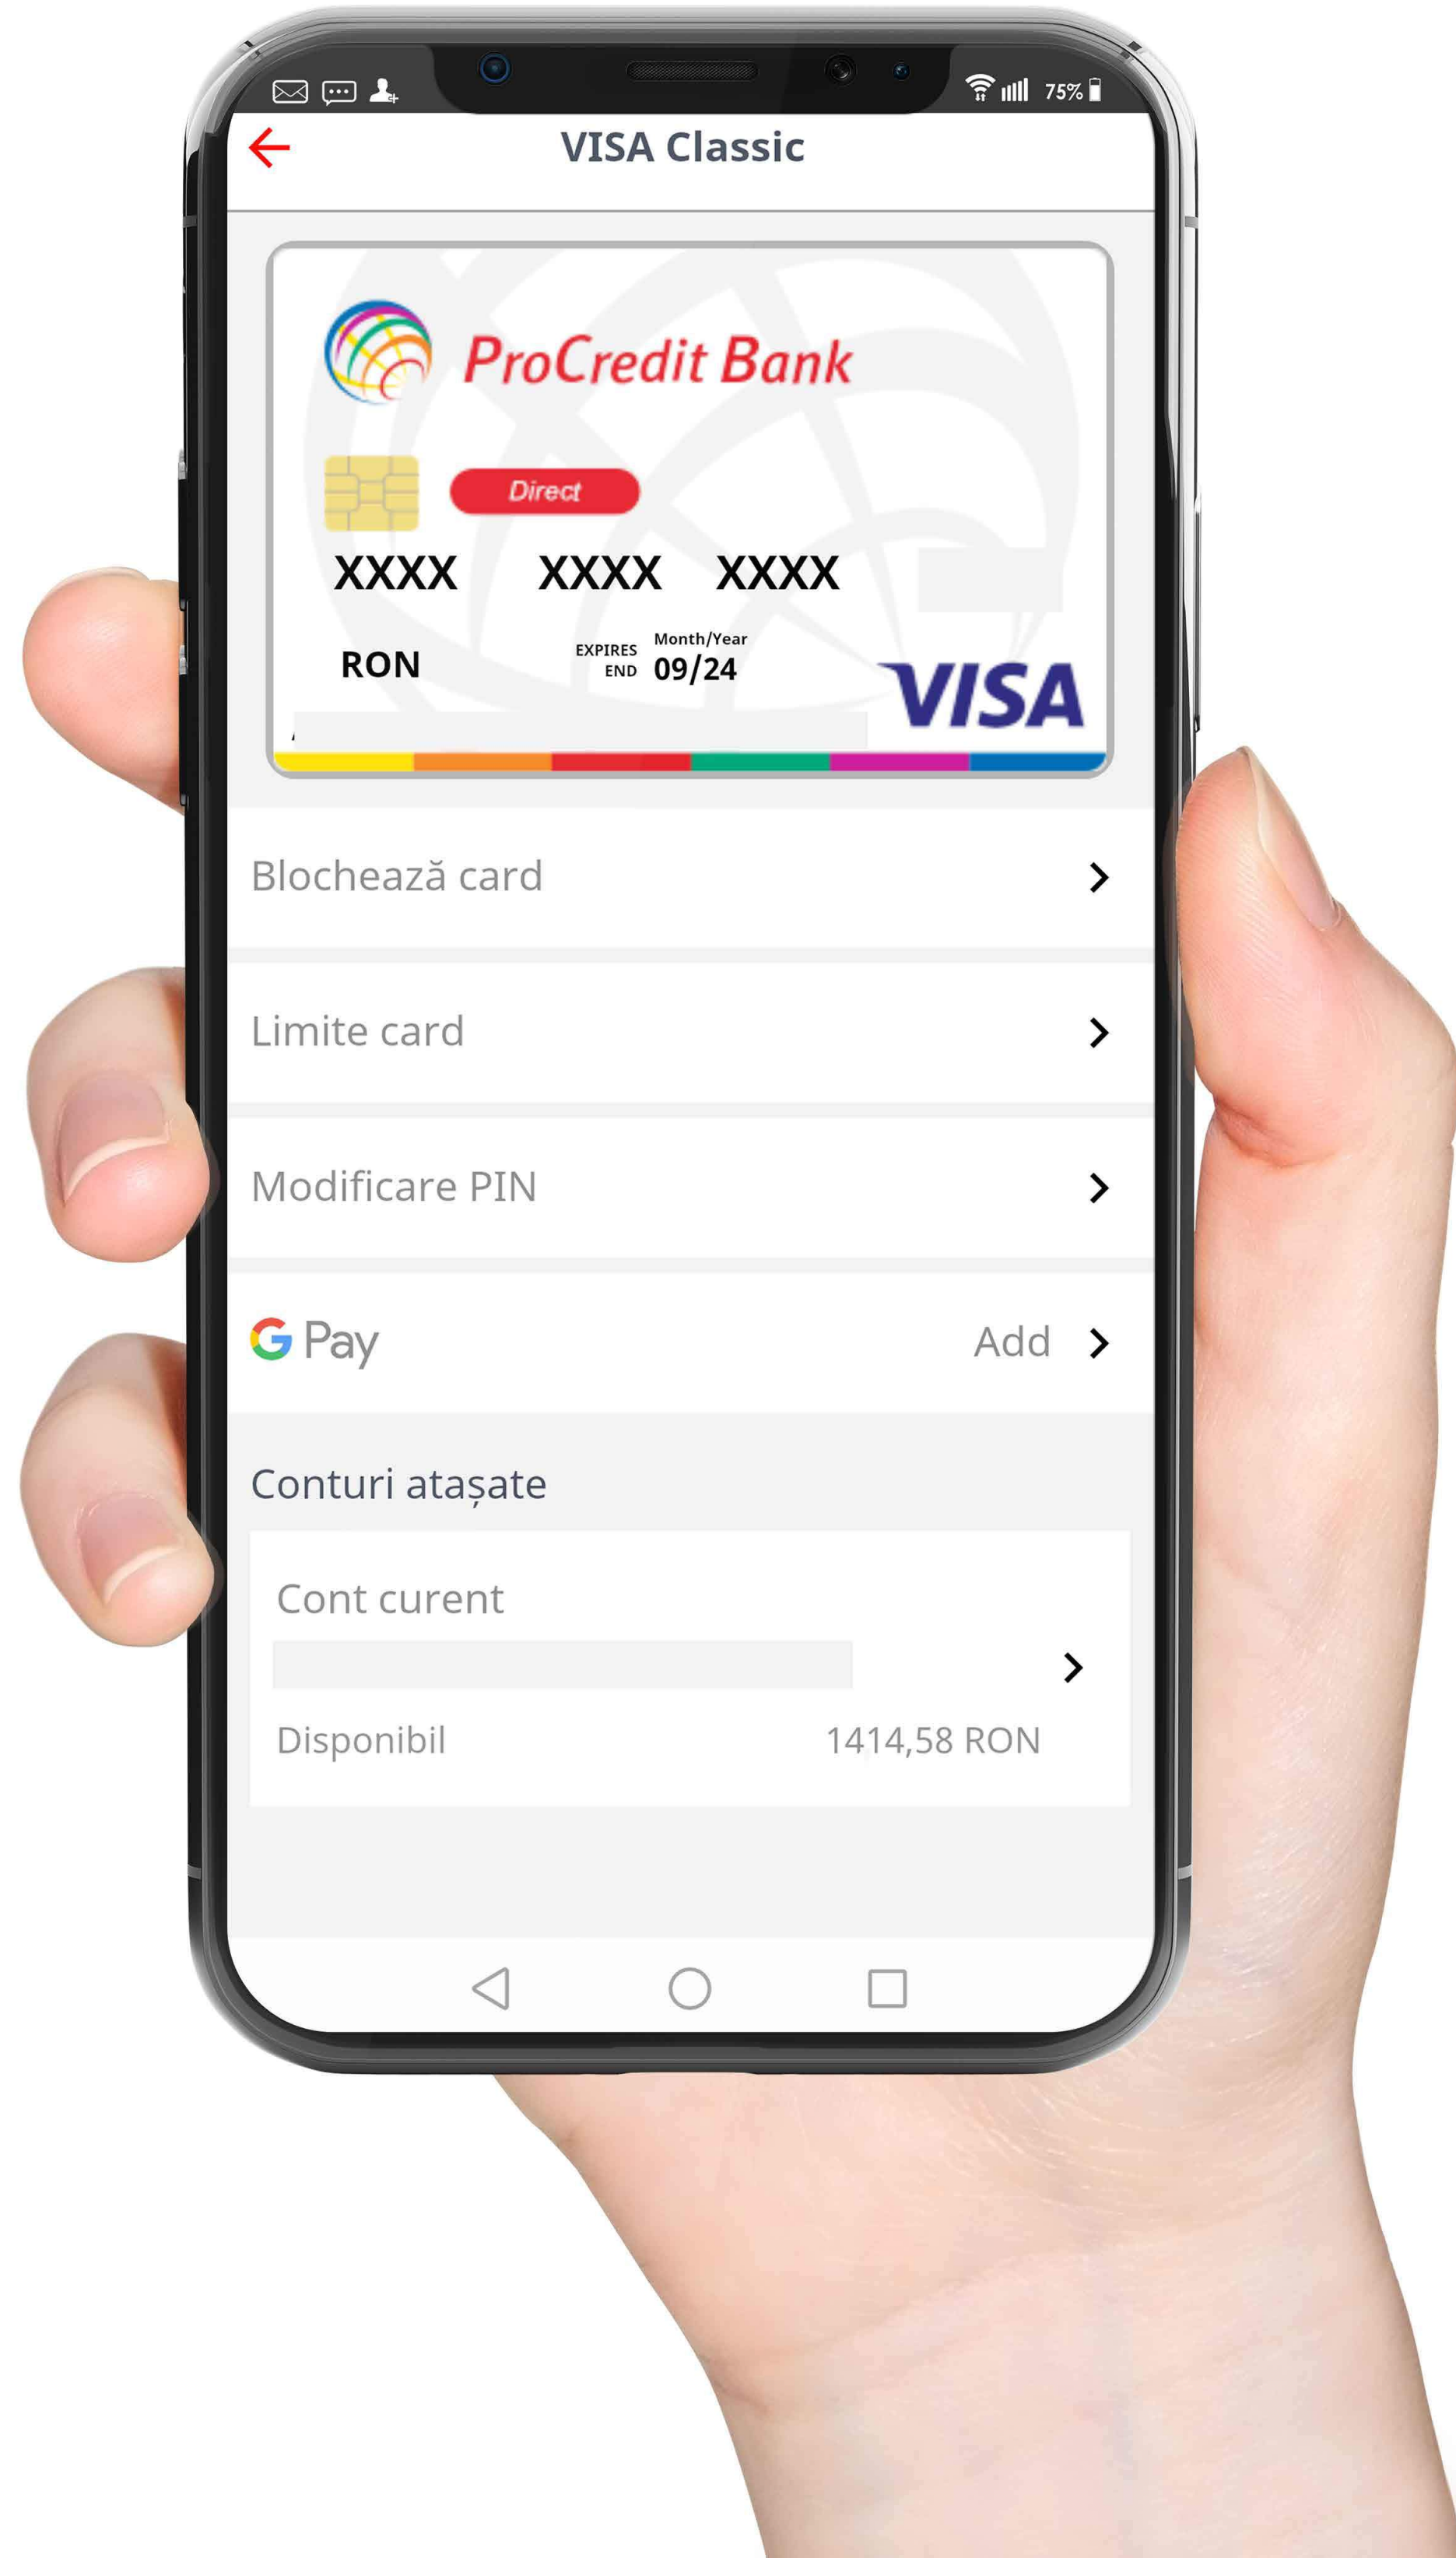

Select the **Cards** menu found at the bottom of your screen.

## 3<sup>rd</sup> Step

Choose the card you want to enroll in Google Pay.

## 4<sup>th</sup> Step

Select the **Add** option to add your Card to Google Pay.

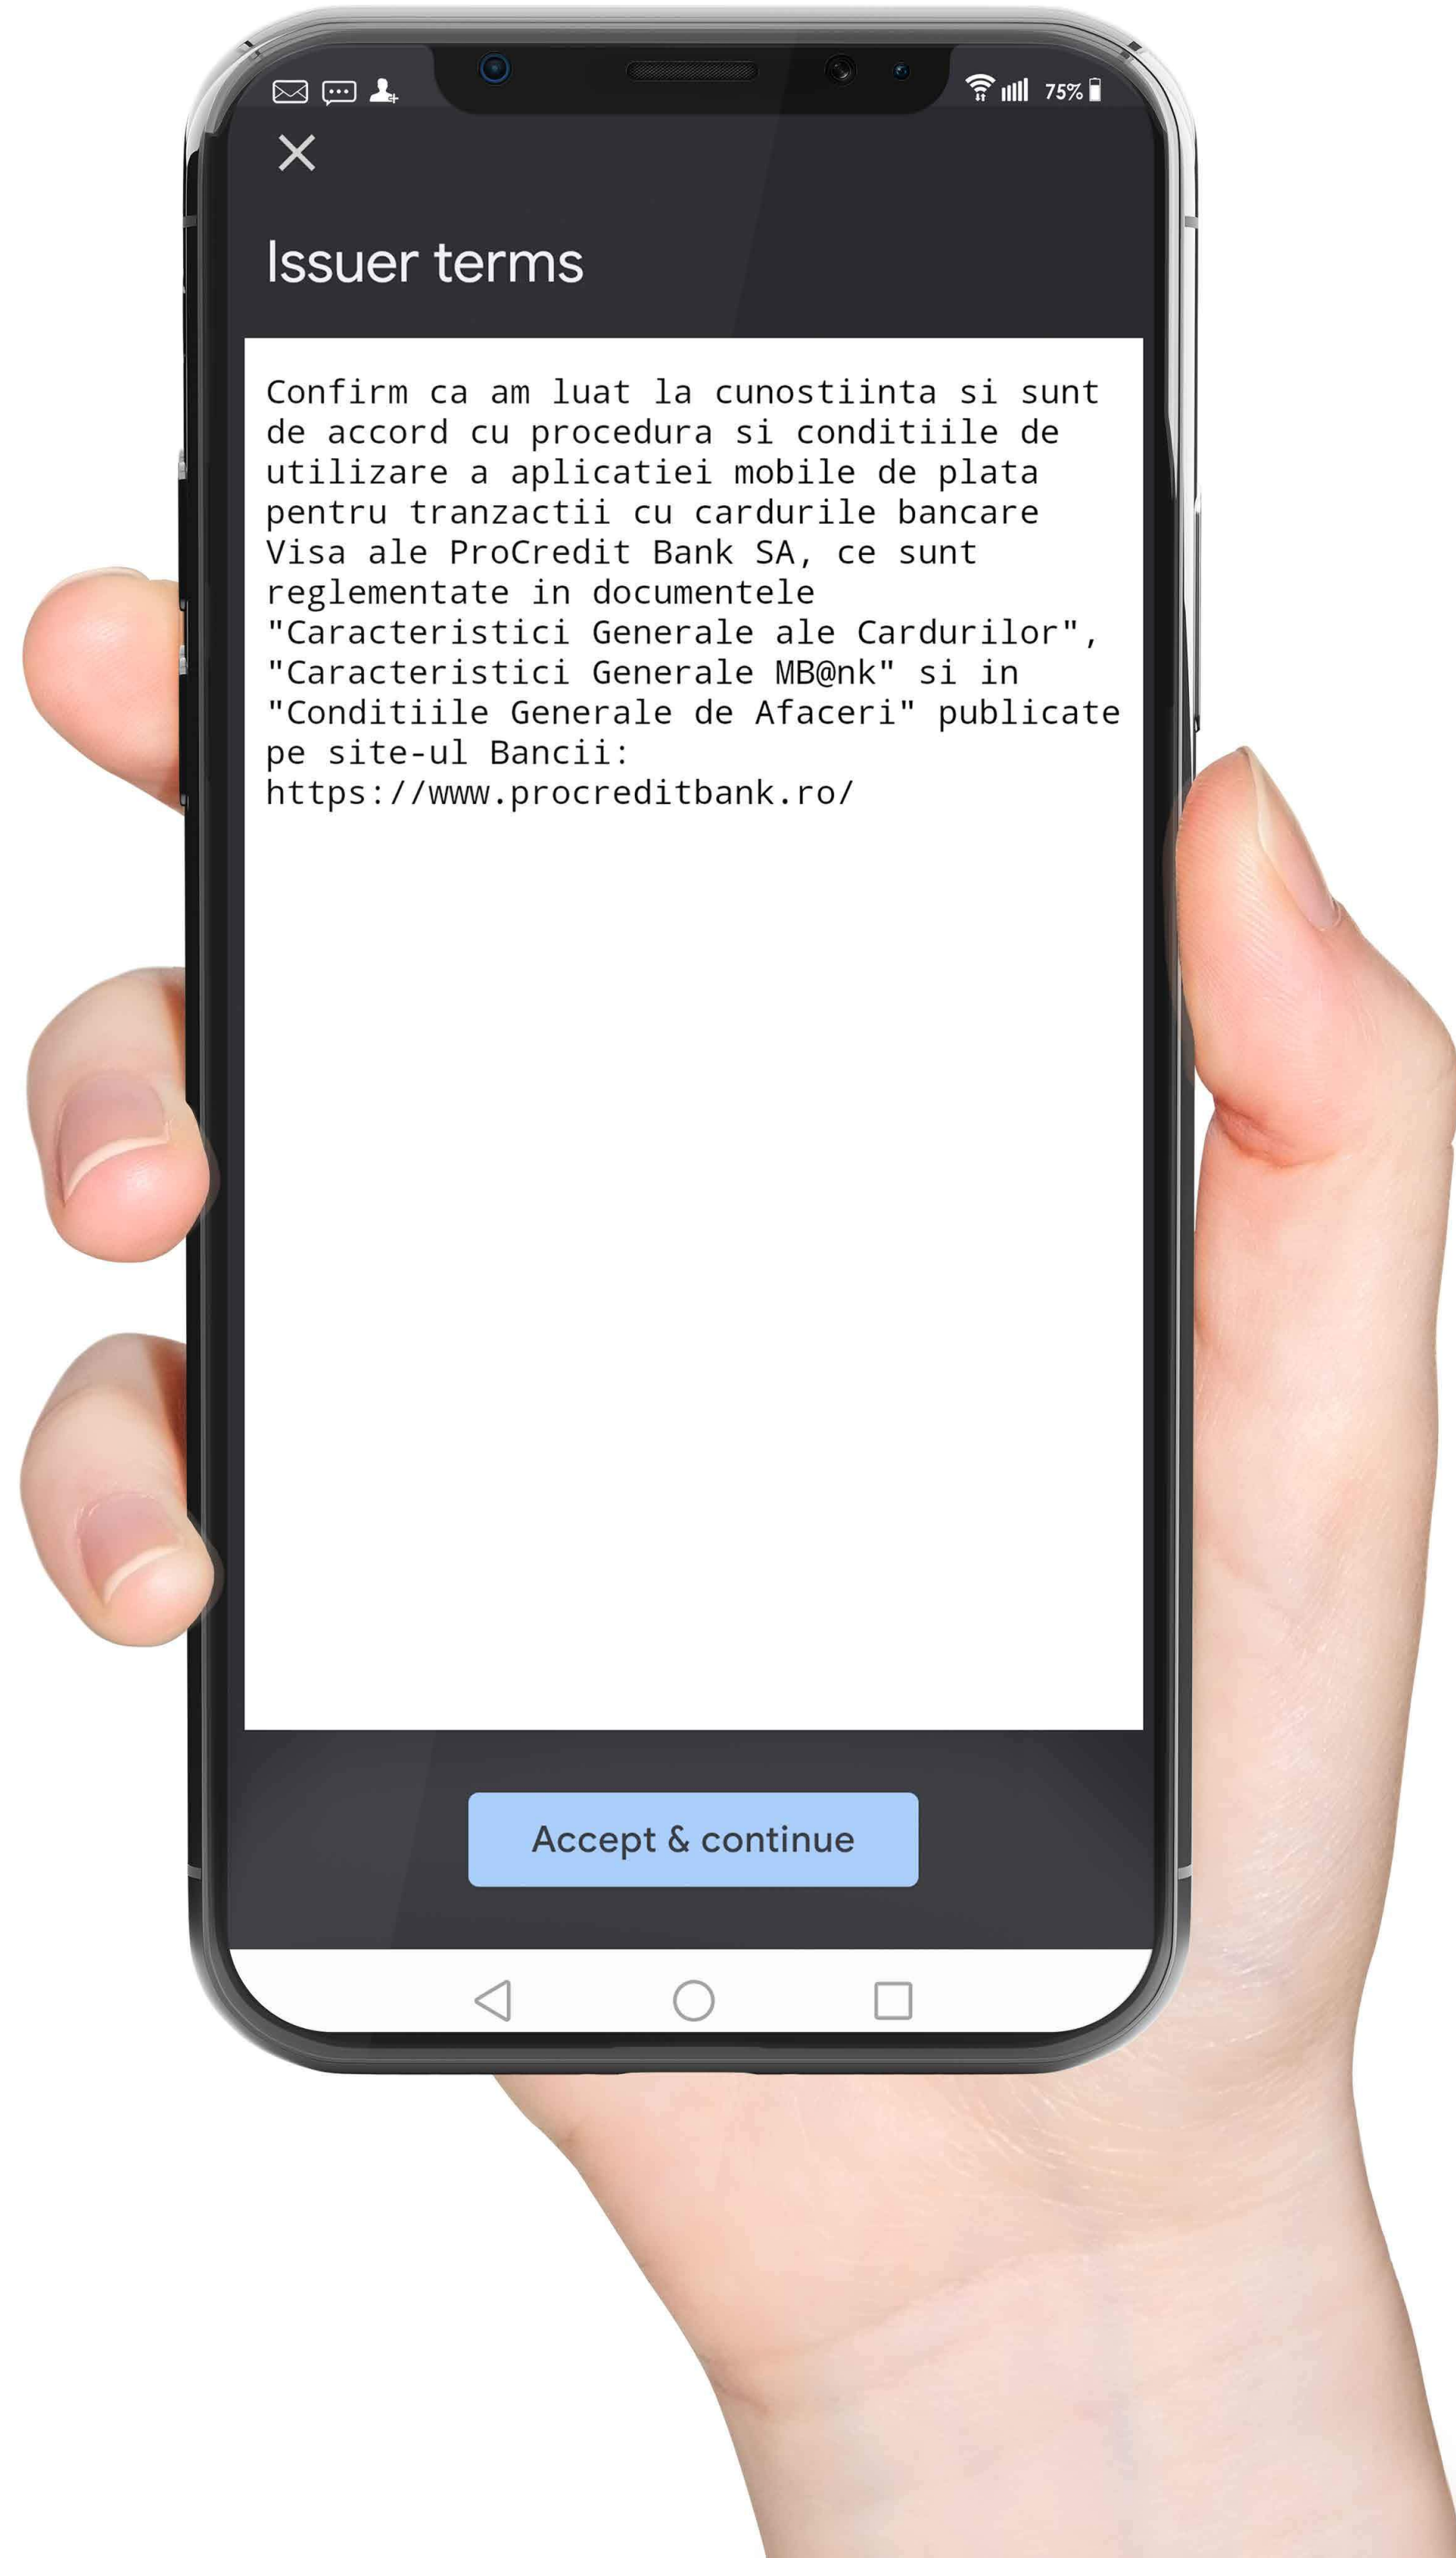

## 5<sup>th</sup> Step

If you already installed the Google Pay app, you will be redirected to it. From that point forward, there are only a few steps left to complete the process of card enrollment.

In case you're having trouble with the process, make sure that your phone uses an Android operating system with NFC, and most importantly, that it can access Google services.

## 6<sup>th</sup> Step

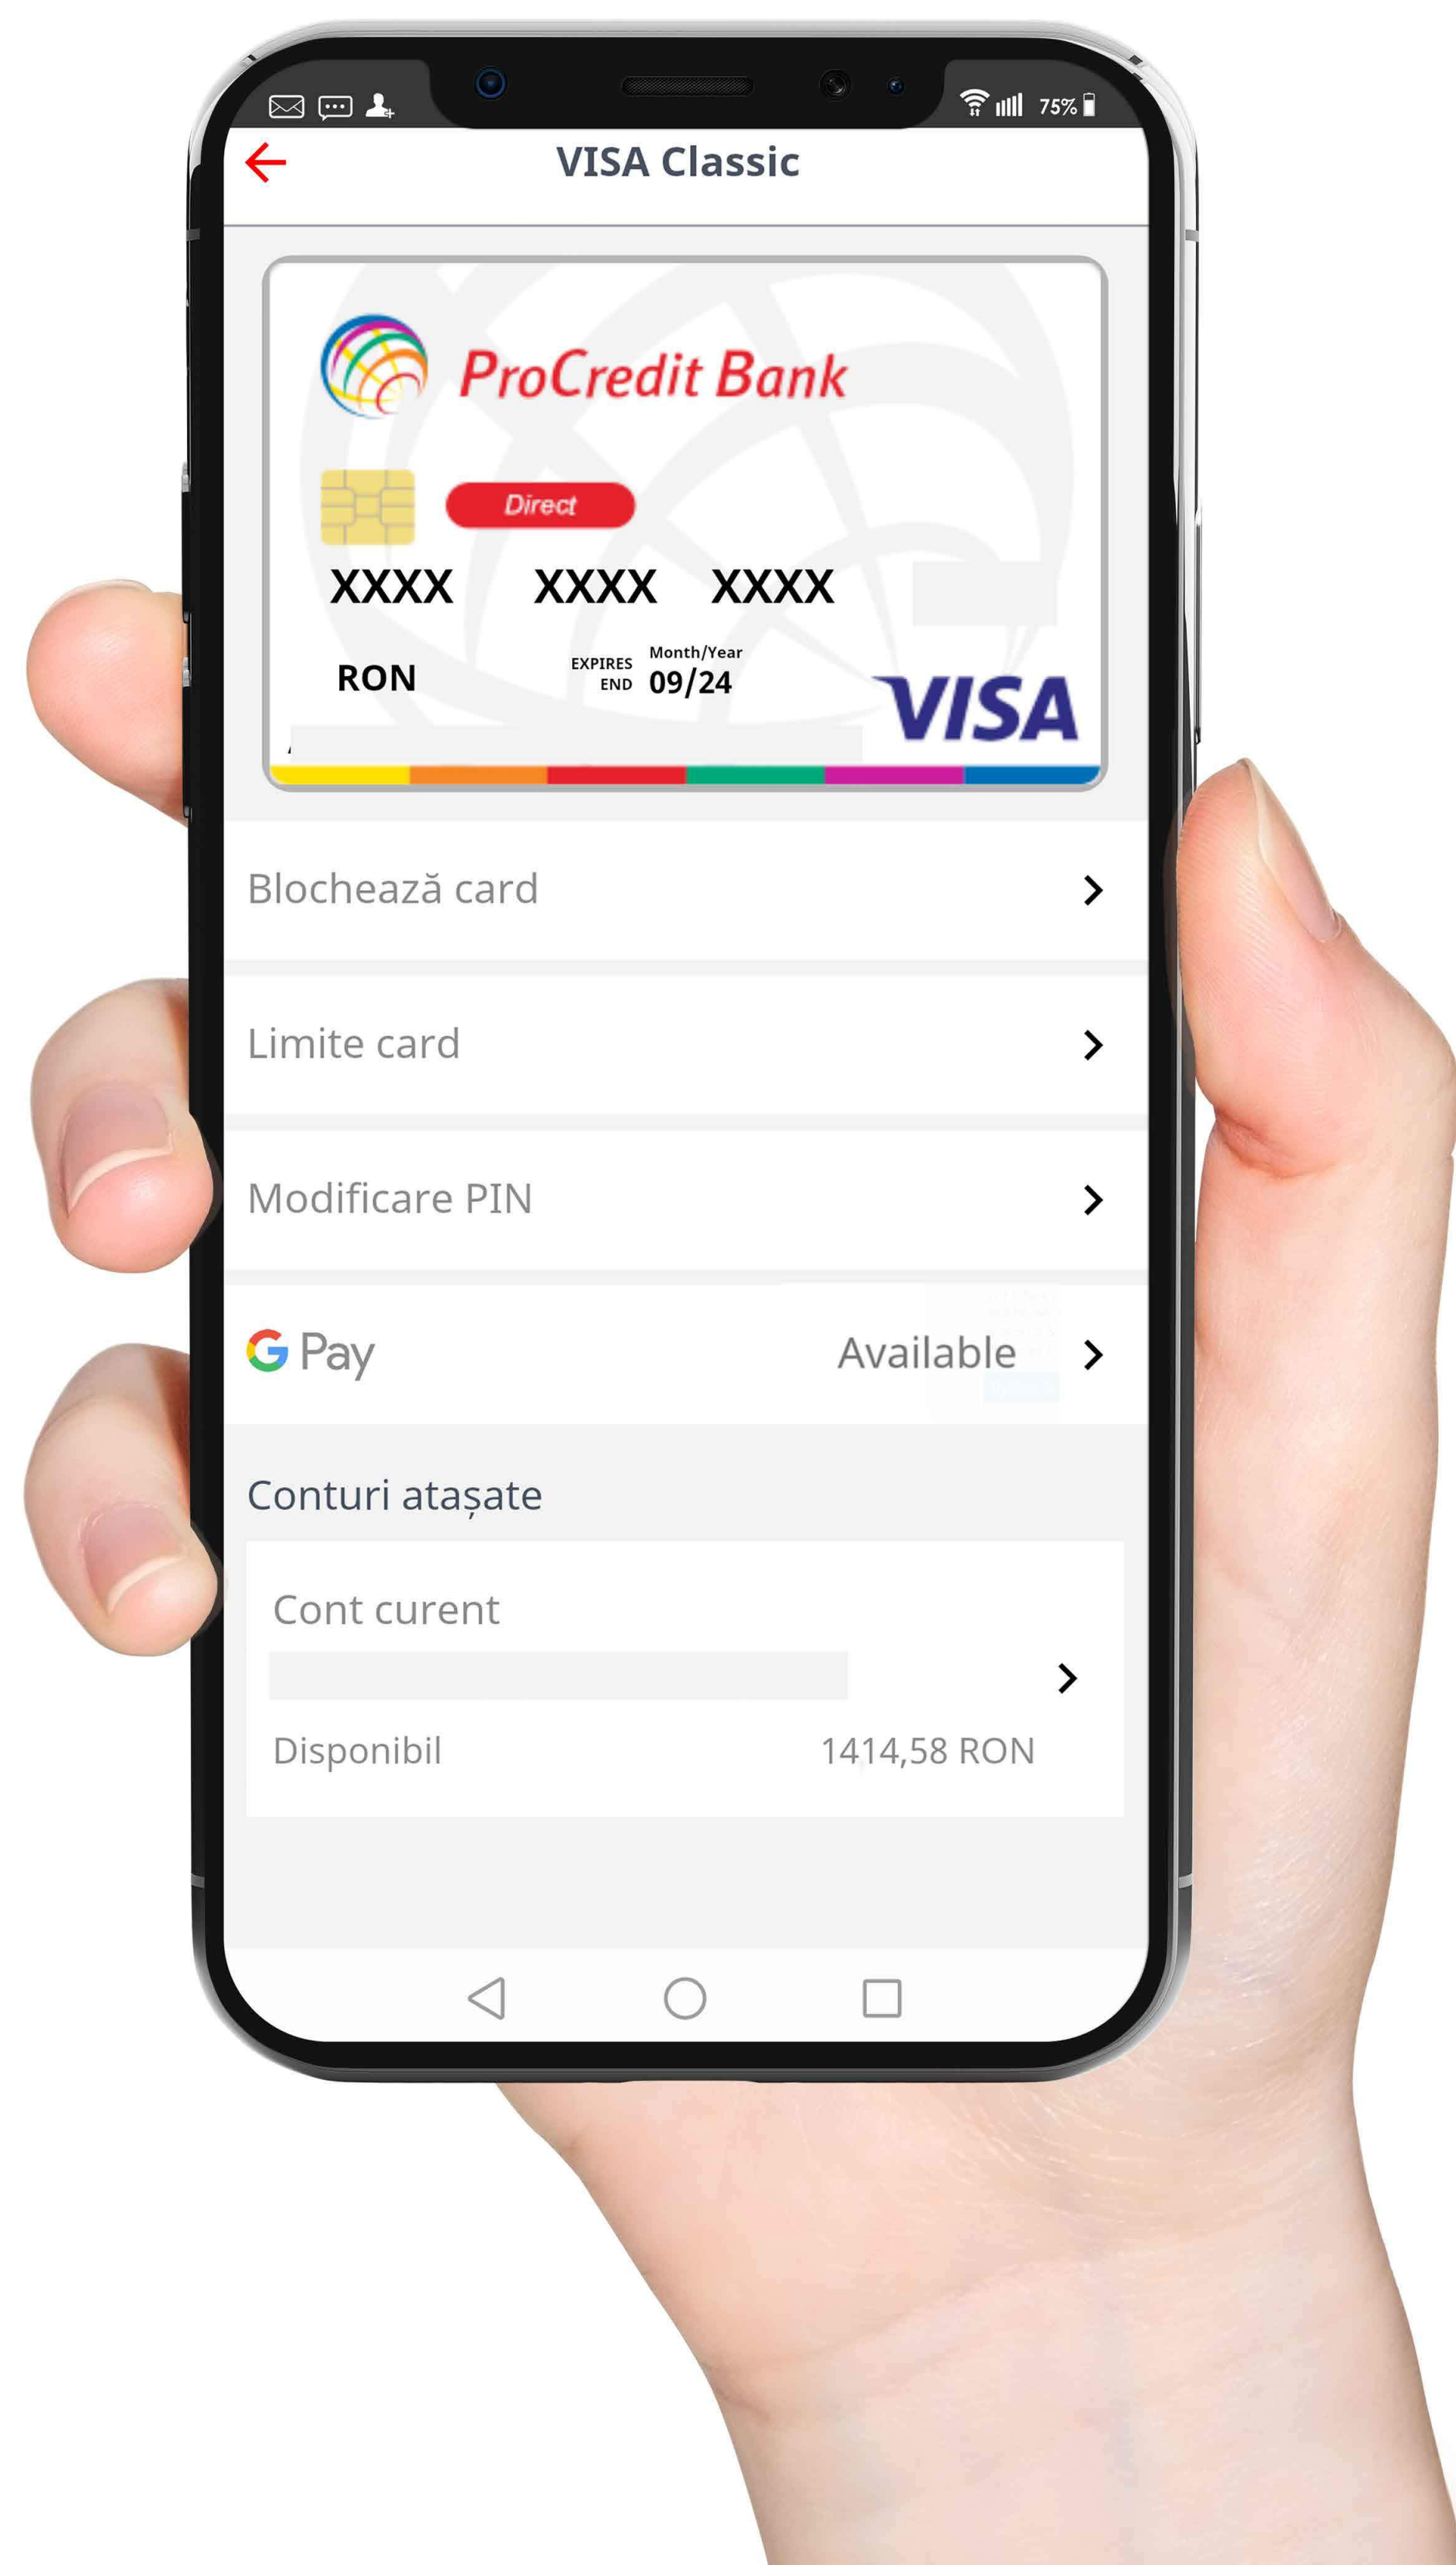

Go to the **General Business Conditions** page to find out about the terms of use for the Mb@nk application, and after accepting them, you can go ahead and enroll your card in Google Pay.

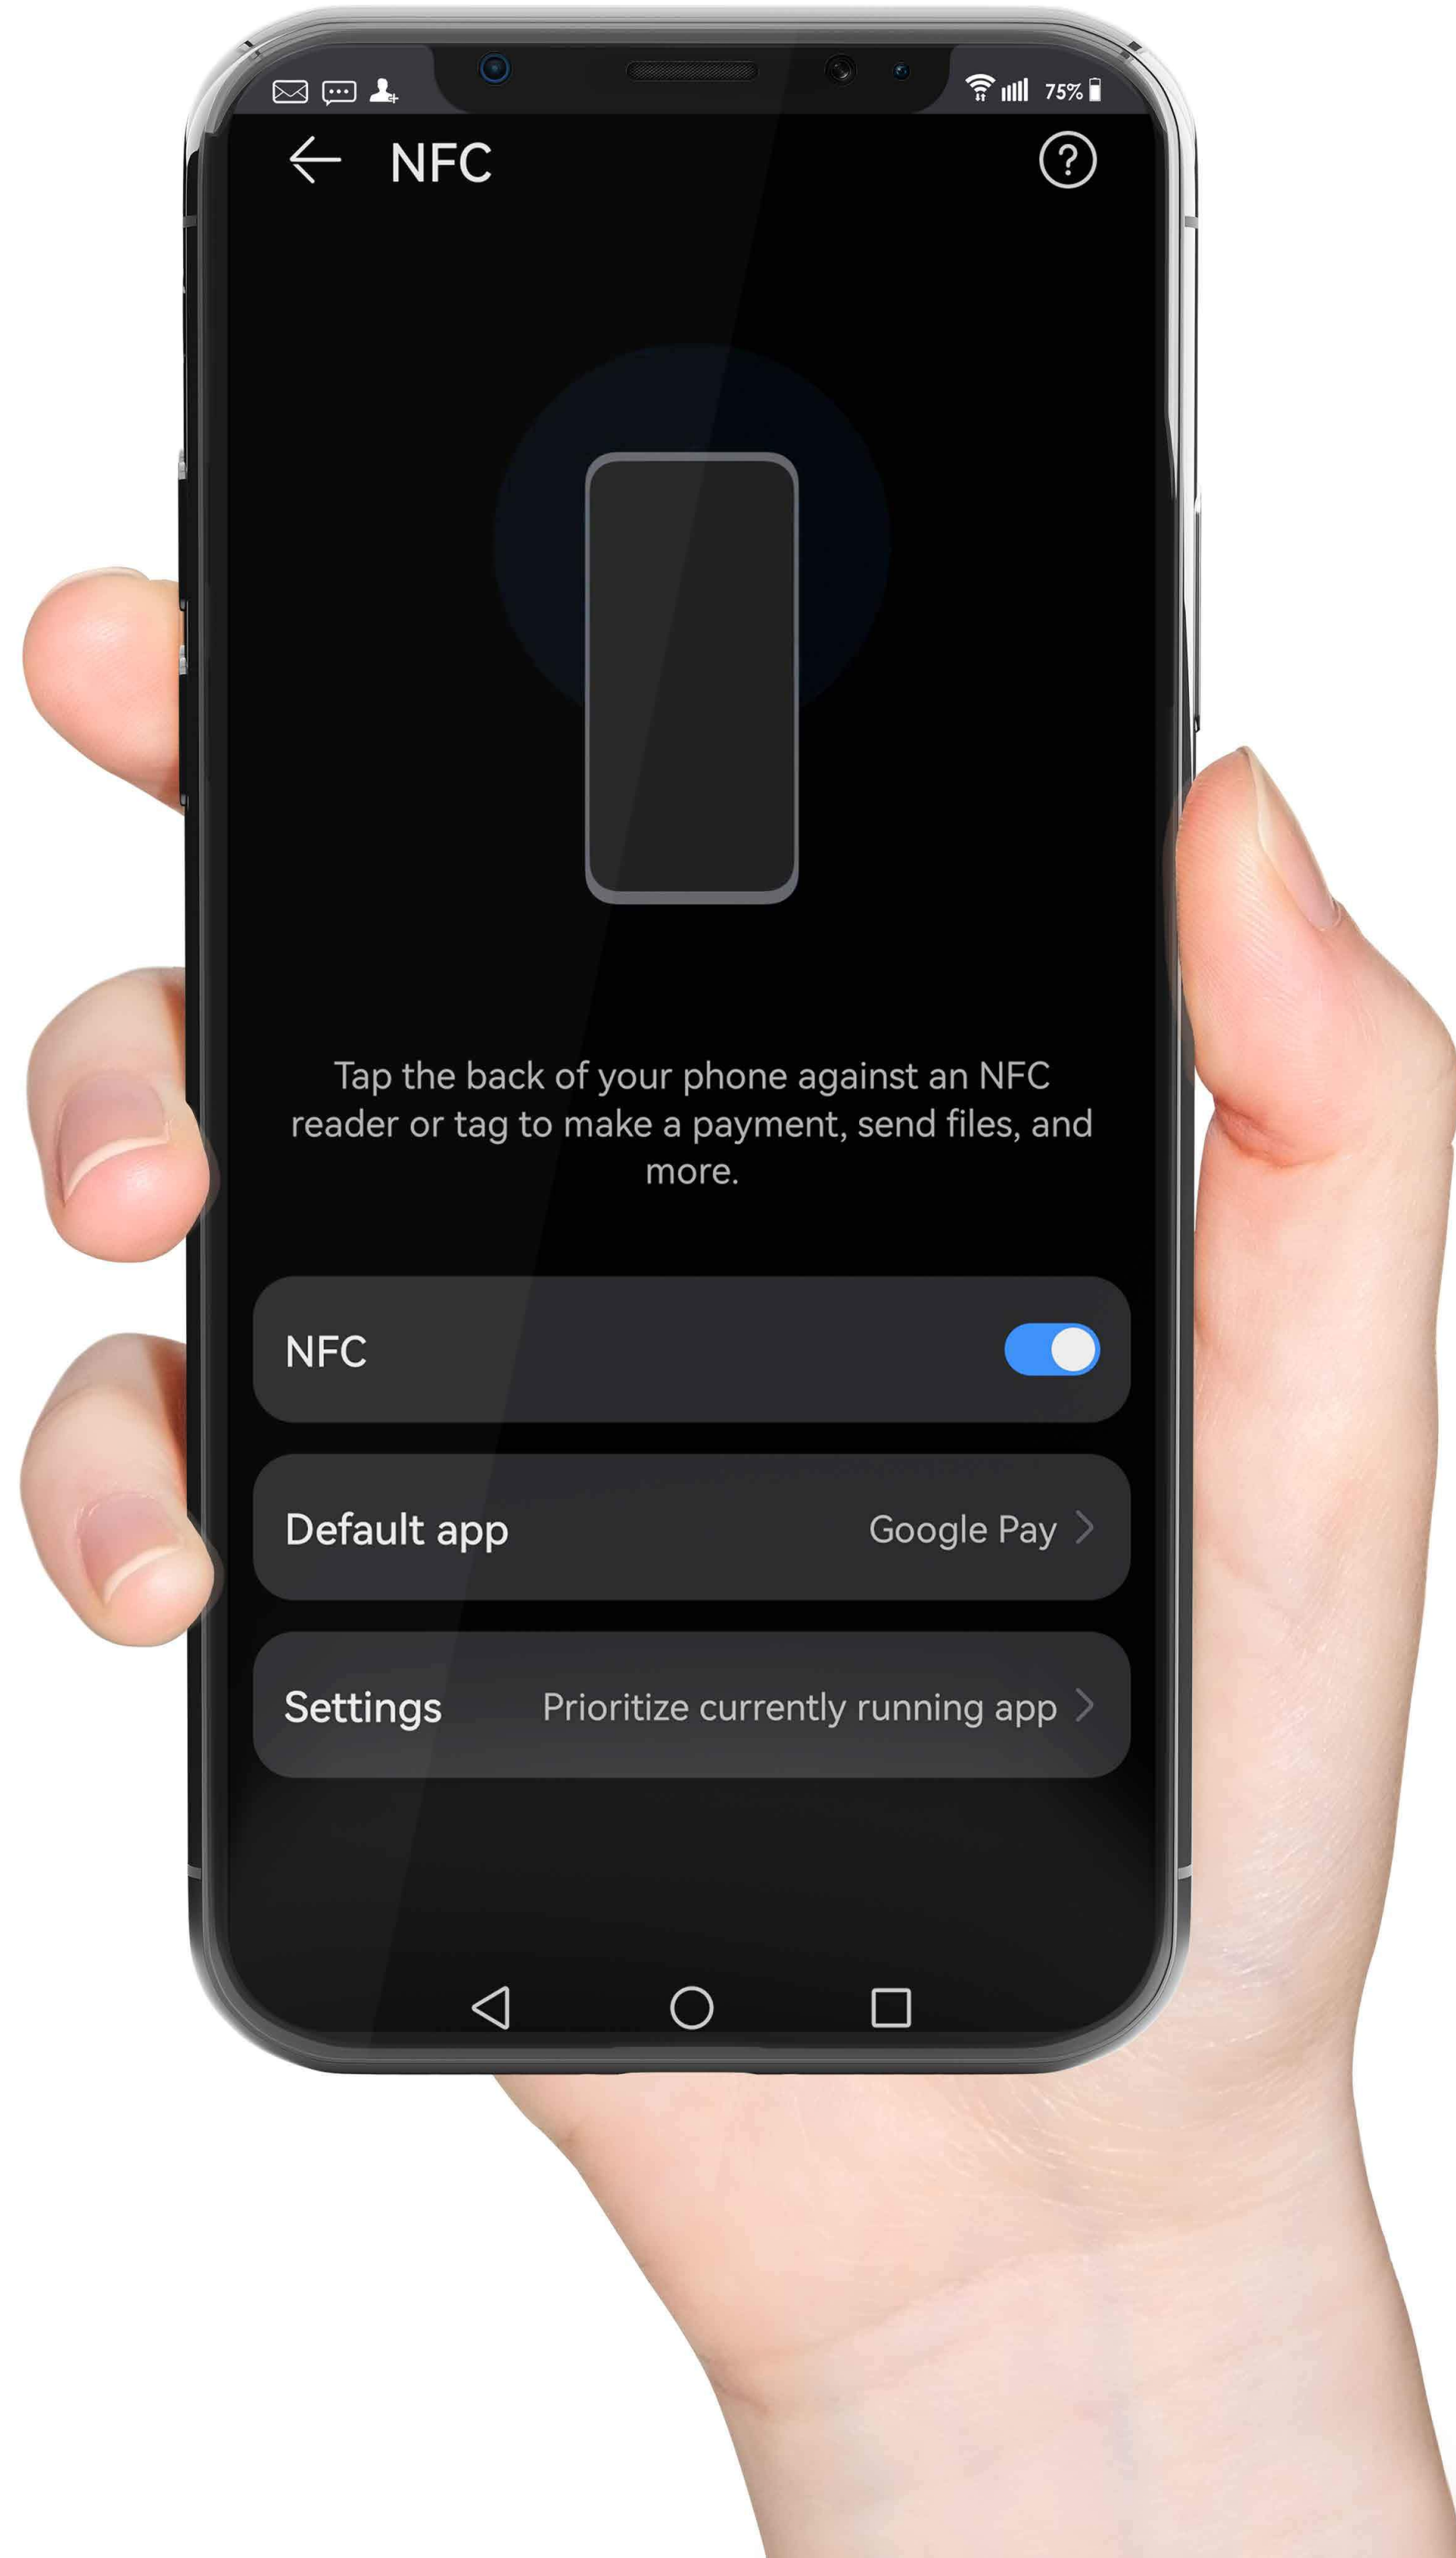

**ProCredit Bank**

## Pasul 7

To verify the successful enrollment of your card in Google Play, open the Mb@nk application in the Cards menu and select the desired ProCredit Bank card. On the next screen of the app, you should see in the card details: Google Pay - Available.

## NFC Settings

Check the default options for NFC payments. Depending on the type of phone used, they may differ, so we recommend that you make sure that Google Pay is the main application for making NFC payments. Check this option before making your first contactless payment with your ProCredit Bank card.

# Make sure that...

Your ProCredit Bank card is set up as your primary payment method in Google Pay, for contactless payments done with your smartphone. Now you can start shopping!
